

I'm a truck driver and an xm listener for over 2 year now. sense xm came out with traffic i have listened to it every time i have gone into one of the major cities. it is an excelent tool for being on the road all the time. it lets you know the temp and traffic and what to expect when your coming in. so don't think about getting rid of it. there will be a lot of truckers out here that would be really pissed. it is a very useful key to a truckers life style.
